TECNICA

TECHNOLOGIES

DER VIELSEITIGSTE HIGH-PERFORMANCE-SKISCHUH IST JETZT NOCH STABILER, LEISTUNGSFÄHIGER UND LEICHTER GEWORDEN

DER NEUE TECNICA COCHISE

COCHISE

T.RIDE

LEISTUNGSSTARKE GEHFUNKTION

Das T-Ride-System ist in die Schuhkonstruktion vollständig integriert. Die feste Verbindung des Schaftabschlusses mit der Schale bietet eine perfekte Kombination aus Effizienz beim Aufstieg und Performance bei der Abfahrt.

PRÄZISE FAHRVERHALTEN

Der im Vergleich zu herkömmlichen Skischuhen längere Hebel des T-Ride-Systems ermöglicht ein schnelleres Umkanten und sorgt für eine höhere seitliche Kraftübertragung und mehr Stabilität.

INTUITIVE SICHERHEIT

Die Bauart des T-Ride-Systems macht den Schuh besonders komfortabel und intuitiv, so dass Sie immer genau wissen, ob er sich im Skimodus oder Gehmodus befindet.

Die Verriegelung des integrierten Lock-Systems gewährleistet, dass der Mechanismus auch bei Landungen auf hartem Untergrund und harten Stößen sicher verschlossen bleibt.

Und der große Bewegungswinkel von 50° macht den Aufstieg zum Gipfel zu einem Spaziergang.

C.A.S. – PERFEKTER HALT FÜR DEN FUSS

MIT DEM C.A.S.-SYSTEM KANN DER SKISCHUH PERFEKT AN DIE FORM JEDES EINZELNEN FUSSES INDIVIDUELL ANGEPAST WERDEN. DIE ANATOMISCH GEFORMTEN INNENSCHUHE UND SCHALEN SIND DER SCHLÜSSEL ZU OPTIMALER PASSFORM SCHON BEI DER ERSTEN ANPROBE. JE BESSER INNENSCHUH UND SCHALE DER NATÜRLICHEN FUSSFORM ENTSPRECHEN, DESTO BESSER SIND HALT UND PERFORMANCE.

C.A.S.-INNENSCHUH

Der C.A.S.-Innenschuh des Cochise ist besonders leicht und der anatomischen Fußform genau nachmodelliert, so dass höchster Komfort und ein optimaler Halt der Ferse gewährleistet sind.

Der Innenschuh besteht aus Dual-Density-Mikrozellenmaterial, das langlebig und einfach anzupassen ist. Für eine perfekte Passform kann der C.A.S.-Innenschuh per Thermo-Verformung, Ausdrücken und Schleifen der Fußform noch genauer angepasst werden. Die neue Faltkonstruktion an der Rückseite des Schuhs erleichtert das Gehen.

COCHISE 130 DYN GW

COCHISE 120 DYN GW
COCHISE 110 DYN GW

C.A.S.-SCHALE

Ein Merkmal der C.A.S.-Schale ist die anatomische Form, die der Fußform genau folgt. Dies ermöglicht eine bessere Out-of-the-Box-Passform. Die kleinen Vertiefungen auf der Schale sorgen für eine geringere Oberflächenspannung und erleichtern das Erwärmen, was die Anpassung der Schale vereinfacht. Das Schalenmaterial gewährleistet, dass die Passform lange erhalten bleibt.

C.A.S.-ZUNGE

Eine sehr nützliche Erweiterung des C.A.S.-Systems: die C.A.S.-Zunge. Die Zunge des Innenschuhs lässt sich durch ihr thermoverformbares Material dem Schienbein perfekt anpassen.

- Individuelle 3D-Formgebung der Zunge
- Keine schmerzenden Schienbeine mehr
- Bessere Performance
- Einfache Thermoanpassung

TECHNISCHE MERKMALE

ARCH GRIP

Die Gummiprofile im Zehen- und Fersenbereich sind durch einen Arch Grip aus Gummi miteinander verbunden, wodurch der Schuh vielseitiger im täglichen Gebrauch wird. Das Ergebnis: mehr Rutschfestigkeit in bergigem Gelände, auf Metallleitern oder auf Schneemobilen.

ASYMMETRISCHE KRAFTÜBERTRAGUNG

Im Inneren der Schale ist der Kunststoff an allen wichtigen Stellen dicker, so dass der Fuß besser gestützt wird.

Hierdurch werden die seitliche Kraftübertragung und der Kantengriff verbessert.

MEHR BEWEGLICHKEIT

Der neue Gelenkpunkt ermöglicht ein leichteres und kraftsparendes Gehen.

LEICHTER EINSTIEG

Ein weiches Material macht den Ein- und Ausstieg sehr komfortabel, so dass unnötige Schmerzen, insbesondere bei niedrigen Temperaturen, vermieden werden.

POWER LOCK

Der Power Lock Strap sorgt für optimale Kontrolle und noch präzisere Kraftübertragung auf den Ski. Durch den Haken muss das Klettband nicht vollständig gelöst werden, was Zeit spart.

PERFORMANCE NEU DEFINIERT

T.DRIVE-TECHNOLOGIE

EINE BAHNBRECHENDE
TECHNOLOGIE, DIE
DIE PERFORMANCE
UND DEN KOMFORT
DES SCHUHS DANK
EINER INNOVATIVEN
VERBINDUNG
VON SCHALE UND
SCHAFTABSCHLUSS
NEU DEFINIERT.

TECHNISCHE MERKMALE

PRÄZISE FAHRVERHALTEN

Die stehend verbaute Carbonlage von T-Drive verbindet den Schaftabschluss mit der Schale und sorgt so für einen längeren Hebel im Vergleich zu herkömmlichen Skischuhen. Dies ermöglicht:

- Schnelleres Umkanten
- Bessere seitliche Kraftübertragung und Stabilität
- Präziseres Kantenfahren

PERFORMANCE NEU DEFINIERT

Die T-Drive-Technologie schafft eine stabilere und wirkungsvollere Verbindung zwischen Schaftabschluss und Schale und sorgt so für einen optimierten Flex und eine geringere Verformung des Kunststoffes. Das bedeutet, dass die Skischuhe leistungsfähiger sind und weniger Kraftaufwand beim Fahren erfordern. Sie übernehmen die Arbeit, damit Sie länger und bequemer Ski fahren können.

10%

schneller als andere Skischuhe

25%

mehr seitliche Kraftübertragung

20%

mehr Kantenstabilität

10%

weniger Materialverformung

FLEX

Verschiedene Flex-Grade (progressiverer Flex))

TRAGEKOMFORT

Die individuelle Passform bleibt lange erhalten.

MEHR KOMFORT

Die T-Drive-Technologie sorgt unabhängig von den Außentemperaturen für einen konstanten Flex, wodurch die Verformung der Schale verringert und ein gleichbleibender Halt erreicht wird.

Da der Fuß durch T-Drive gestützt wird, konnte für Schale und Schaftabschluss weiches Material verwendet werden.

Hierdurch schmiegt sich der Schuh besser an den Fuß an und lässt sich leichter an- und ausziehen, ohne dabei Abstriche bei der Leistung machen zu müssen.

LV

Low volume

MV

Mid volume

HV

High volume

VOLUMEN NACH MASS

Beste Passform – schon bei der ersten Anprobe. Durch die präzise angepasste anatomische Form sind mehr Komfort und bessere Performance gewährleistet.

Die Mach1-Serie wird in 3 verschiedenen Volumengrößen angeboten, um für jede Fußform eine optimale Passform zu gewährleisten: LV-MV-HV

- Low volume: 98 mm
- Mid volume: 100 mm
- High volume: 103 mm

C.A.S.-INNENSCHUH

Die Form des C.A.S.-Innenschuhs folgt der anatomischen Fußform, so dass höchster Komfort und ein optimaler Halt der Ferse gewährleistet sind.

Der Innenschuh besteht aus Dual-Density-Mikrozellenmaterial, das langlebig und einfach anzupassen ist.

Für eine perfekte Passform kann der C.A.S.-Innenschuh per Thermo-Verformung, Ausdrücken und Schleifen der Fußform weiter angepasst werden.

C.A.S.-SCHALE

Ein Merkmal der C.A.S.-Schale ist die anatomische Form, die der Fußform genau folgt. Dies ermöglicht eine bessere Out-of-the-Box-Passform. Die kleinen Vertiefungen auf der Schale sorgen für eine geringere Oberflächenspannung und erleichtern das Erwärmen, was die Anpassung der Schale vereinfacht. Das Schalenmaterial gewährleistet, dass die Passform lange erhalten bleibt.
